

Technical features

Typologies

Chair on four-leg base with feet, fixed seat, with or without armrests, stackable and connectable.

Chair on four-leg base with castors, tip-up seat and manual seat rotation device, with or without armrests, stackable horizontally.

Chair on swivel base with or without arms.

Beam-mounted seating, fixed seats with no armrests.

Seat and backrest

Three versions of the seat and backrest are available.

Wood

Moulded and curved plywood; treated with transparent, texturized polyurethane varnish, with non-reflective, non-slip and scratchproof properties; oak, grey oak and eucalyptus finish.

Thermoplastic resin

In Class 1 (Italian regulations) fire-resistant polypropylene with A.U.V. additives in the following finishes:

- Single colour, with a matt, anti-slip surface on the seating side and smooth, polished surface on the back, available in white RAL 9016, black RAL 9005, beige RAL 1019 and light grey RAL 7040.
- Two-colour, with a white matt, anti-slip surface on the seating side and black RAL 9005, red, beige RAL 1019 or light grey RAL 7040 smooth, polished surface on the back.

Upholstered

- Fully upholstered and covered, with plywood internal structure and flame-retardant, polyurethane foam padding (not applicable in the version on beam)
- Partially upholstered and covered, with covered and fully upholstered seat and wood or thermoplastic resin backrest; plywood internal seat structure and flame-retardant, polyurethane foam padding; coverings as shown in the sample book.

Fixed and tip-up chair structure

Extruded aluminium legs with painted or polished finish, attached to a die-cast aluminium cross beam.

Tip-up chair fitted with manual seat rotation device and die-cast aluminium seat supports.

Covered with semi-matt white RAL 9010, semi-matt black RAL 9005 or semi-matt silver epoxy-polyester powder paint.

Thermoplastic tips and feet.

Swivel chair structure

Seat and backrest support in painted die-cast aluminium, in aluminium colour on polished aluminium swivel base or in black colour on black nylon swivel base.

5 star swivel base in polished aluminium or black nylon, complete with castors or skids.

Seat fitted with gas lifting system.

Beam-mounted seat structure

Seat and backrest supports in painted die-cast aluminium.

Square-section, painted, extruded aluminium beam with special internal ribbing and external grooves, and fitted with two, three or four seats.

Seat support, backrest and table in painted, die-cast aluminium.

Painted moulded sheet metal bases with black adjustable polypropylene feet RAL 9005.

Covered with semi-matt white RAL 9010, semi-matt black RAL 9010 or semi-matt silver epoxy-polyester powder paint.

Accessories

Fixed or detachable arms, removable writing tablet with integral laminate top, available with anti-panic or vertical tip-up movement. Dimensions 28x29,5 cm.

Nesting right arm with foldaway tablet with vertical tip-up movement for folding chairs.

Painted aluminium arm structure, polished die-cast aluminium armrests.

Tablet joint in black painted steel.

Foldaway connecting hook in black nylon.

Row identification and seat numbering elements in black polypropylene RAL 9005.

Dolly.
